AI and Analytics using Zia

1. Aim

To study the Artificial Intelligence (AI) and Analytics features of **Zia** in Zoho Creator by utilizing AI-powered insights, predictions, data analysis, and business intelligence to improve decision-making and application performance.

2. Introduction

2.1 Zia – Artificial Intelligence in Zoho Creator

Zia is the Artificial Intelligence assistant integrated into Zoho Creator. It helps users analyze data, generate insights, make predictions, automate routine tasks, and improve business productivity. Zia uses machine learning and natural language processing (NLP) to provide intelligent recommendations and support data-driven decisions.

2.2 Analytics using Zia

Zia Analytics enables users to visualize and interpret application data through AI-generated reports, charts, trends, and predictions. It identifies patterns, detects anomalies, forecasts future outcomes, and provides actionable insights for business improvement.

3. Objectives of the Study

- To understand the AI capabilities of Zia in Zoho Creator.
- To analyze application data using AI-powered analytics.

- To generate reports and predictive insights.
- To understand trend analysis and anomaly detection.
- To improve decision-making using intelligent recommendations.

4. Procedure

1. Log in to Zoho Creator.
2. Open an existing application with sample data.
3. Enable Zia AI features.
4. Access the Analytics section.
5. Generate reports and charts.
6. Analyze trends and predictive insights using Zia.
7. Review AI recommendations and anomaly detection.
8. Test natural language queries (if enabled).
9. Save the generated analytics.
10. Publish the application with AI-enabled features.

5. Detailed Analysis

Zia enhances Zoho Creator applications by providing intelligent analytics and automation. It analyzes stored data to identify trends, predict future outcomes, detect unusual patterns, and generate meaningful reports. The AI engine reduces manual analysis and supports faster, more accurate business decisions through real-time insights.

6. Illustrative Example

6.1 Using Zia AI

- Create a Student Management application.
- Store student attendance and marks.

- Enable Zia Analytics.
- Generate attendance trend charts.
- Predict student performance using AI insights.
- Detect students with low attendance using anomaly detection.

6.2 Analytics Dashboard

- Create charts for student performance.
- Display attendance percentage.
- Generate AI-based recommendations.
- View predictive analytics and summary reports.

7. Advantages and Limitations

7.1 Advantages

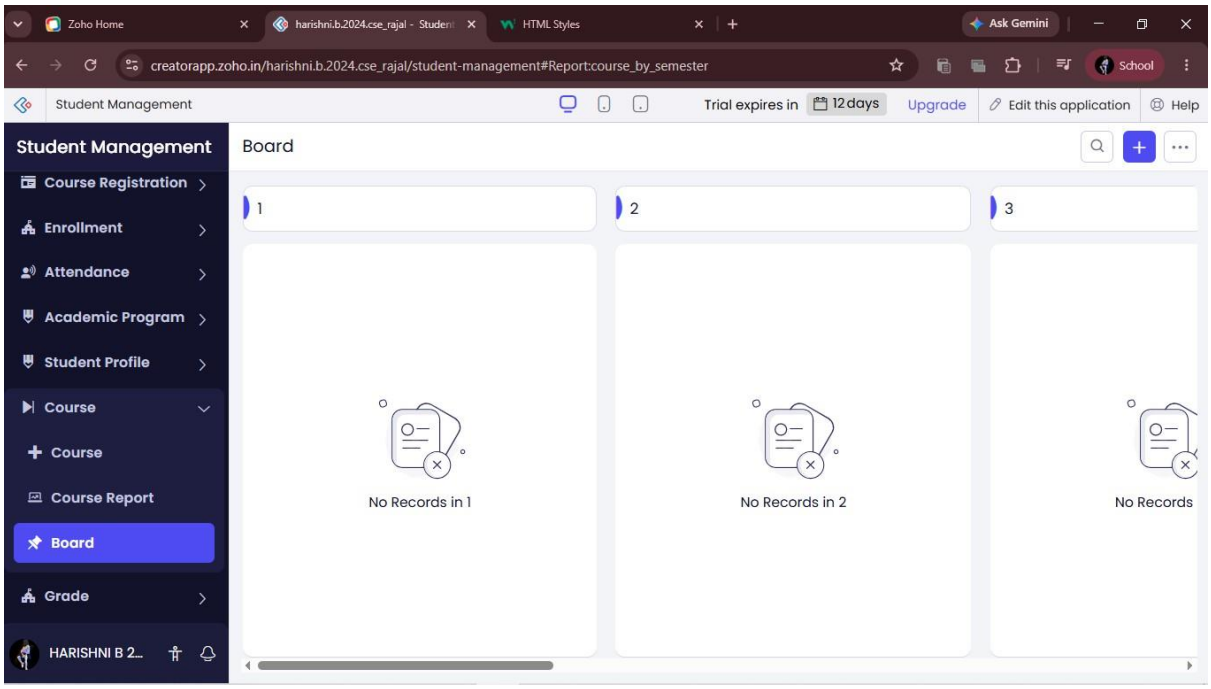

- AI-powered business insights.
- Predictive analytics.
- Automatic trend analysis.
- Faster decision-making.
- Minimal manual data analysis.
- Easy integration with Zoho applications.

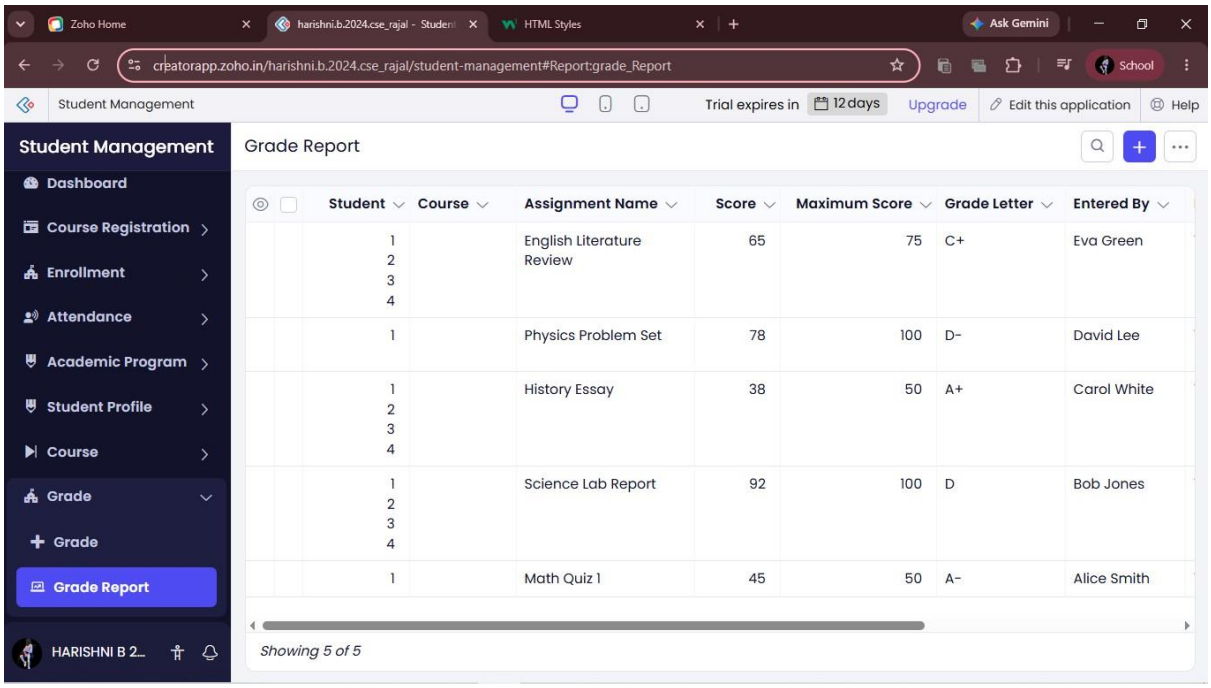

7.2 Limitations

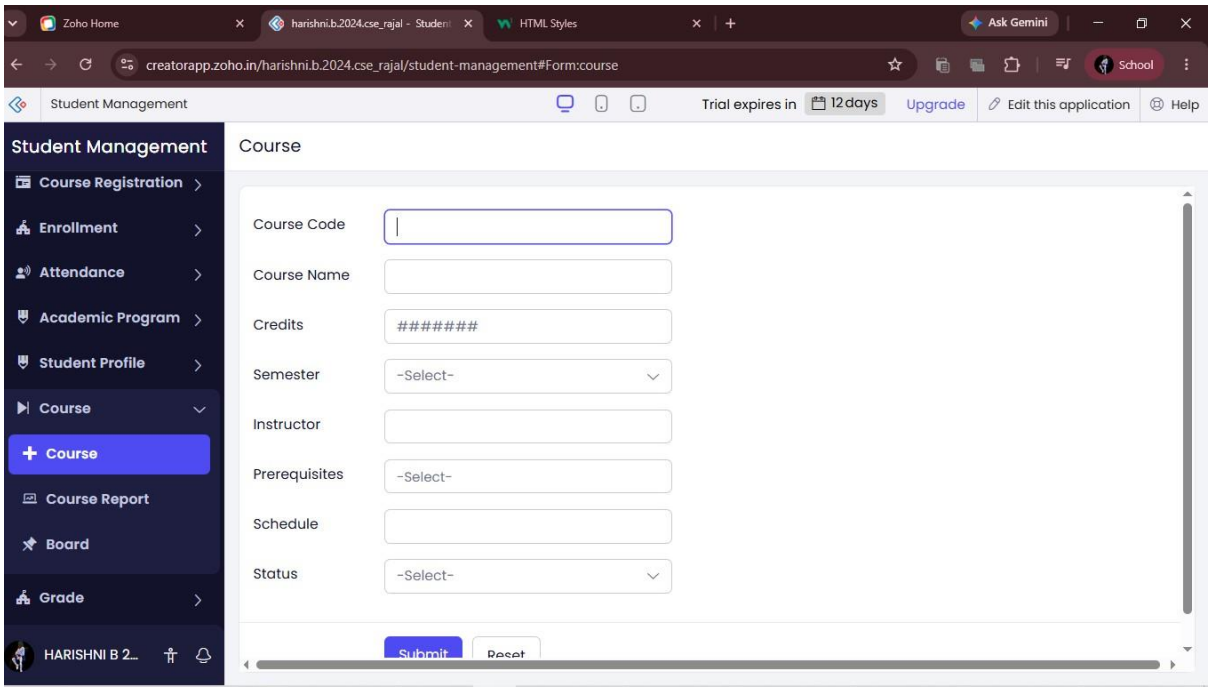

- Requires sufficient data for accurate predictions.
- Advanced AI features depend on platform capabilities.
- Complex analysis may require additional configuration.

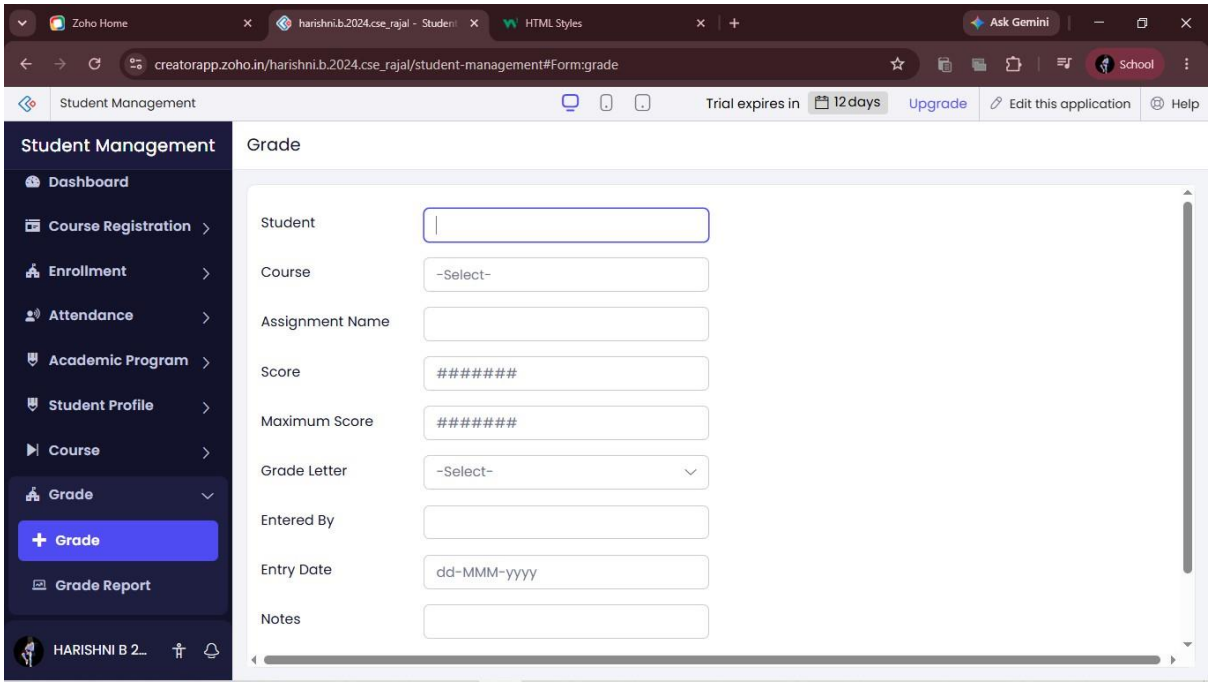

8. Result

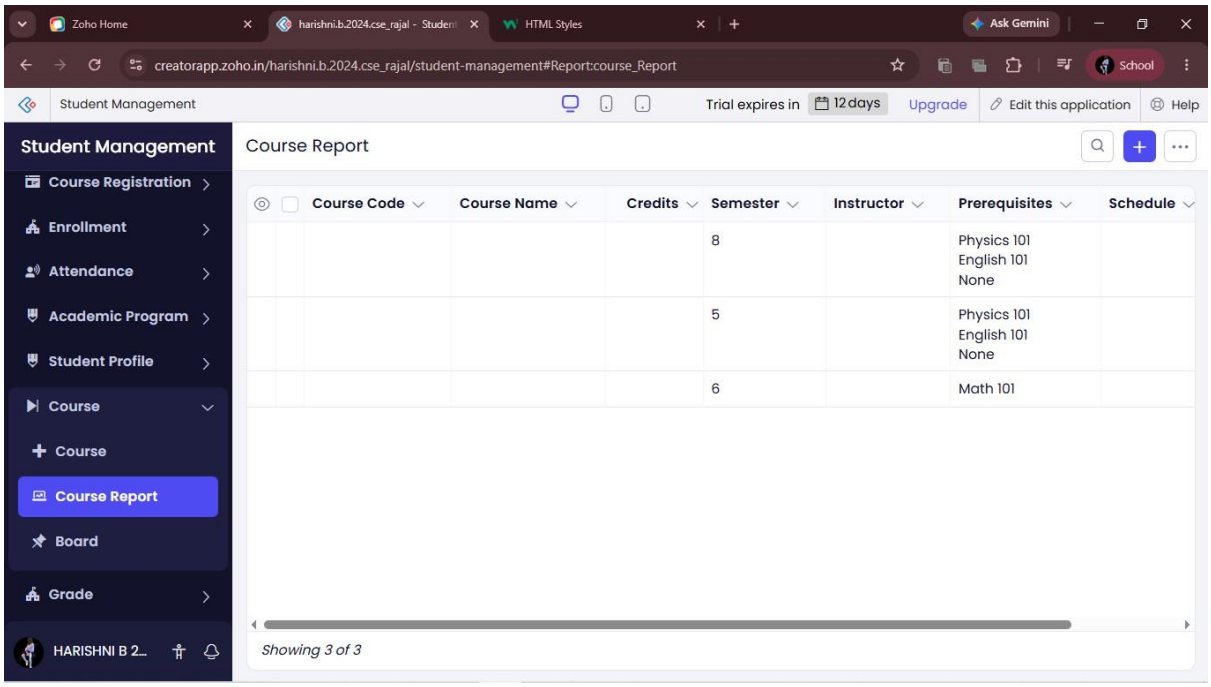

The experiment was successfully completed by using Zia AI and Analytics in Zoho Creator. The platform generated intelligent insights, predictive reports, and visual analytics, helping improve business analysis and decision-making.
